WIN!: Medication Reconciliation

Who: Inpatients

When: At discharge

Where: Dallas County Hospital

Why: Improve Patient Safety

What: Patients who are discharged have a physician reconcile their home medications with what they were taking in the hospital 95.11% of the time.

Benefits: Improves patient safety in regards to medications. This process eliminates duplicate orders for medications, the physician is able to monitor for interactions and the patient leaves the hospital with a correct, up-to-date medication list.
