

Iowa Medicaid COVID-19 Testing

Updated October 6, 2020

Below are testing stats for Iowa Medicaid's two Managed Care Organization (MCOs) – Amerigroup (AGP) and Iowa Total Care (ITC) – as well as Fee-for-Service (FFS) through October 2, 2020:

	Negative	Positive	Total		Deaths	Remain Hospitalized	Recovered
AGP	37,781	1052	38,833	AGP**	45	6	438
ITC	25,500	1133	26,633	ITC***	172	5	2,710
FFS*		361	361	FFS*	16	0	0
Total	63,281	2546	65,827	Total	233	11	3148

Total test counts reflect multiple tests for some individuals.

COVID-19 testing and treatment is a covered benefit for Medicaid members.

* FFS numbers are cumulative April 2020 through September 2020. Positive diagnosis for FFS is based on claims data. Deaths of FFS members are determined based on matching members to eligibility file.

** AGP identifies those members that have a diagnosis of COVID and compares that against those that have passed away (as reported by either the provider or a family member).

*** ITC's COVID deaths are determined by comparing those members with a positive COVID diagnosis that have been identified on either the 834 file with a date of death or through a Social Security Administration data match.
