## Managed Care Report July 2016 Performance Data

Published on September 20, 2016

## OVERVIEW

---

Performance monitoring and data analysis are critical components in assessing how well the managed care organizations (MCO) are maintaining and improving the quality of care delivered to members.

The monthly data reports are a snapshot of information on major contract compliance areas and member enrollment. The department examines the data from a compliance perspective and conducts further analysis if any issues are identified.

Over time, the data experience will grow and produce trend information that will allow us to examine if the MCOs are accomplishing health outcomes and promoting quality in the health care delivery system, in addition to meeting contract requirements. Quarterly reports will include additional data analysis and review of trends.

The MCOs participating in the IA Health Link program include:

- Amerigroup Iowa, Inc. (Amerigroup)
- AmeriHealth Caritas Iowa, Inc. (AmeriHealth)
- UnitedHealthcare Plan of the River Valley, Inc. (UnitedHealthcare)

## NETWORK ADEQUACY AND HISTORICAL UTILIZATION

---

Network Adequacy helps us to ensure that the MCOs are offering a enough providers, and the right types, to serve the IA Health Link population. The IME and the Centers for Medicare and Medicaid Services (CMS) developed a network adequacy tool that is based on Medicaid members' historical utilization of services. **Historical utilization**, as seen in the table below, is a measure of the percentage of assigned members who current providers are part of the managed care network for a particular service or provider type based on claims history.
