

**Technical Assistance and Support for Iowa  
Medicaid Enterprise Services Procurement**

**MED-09-006**

**Amendment 4 – October 6, 2008**

The Department is amending RFP MED-09-006 Technical Assistance and Support for Iowa Medicaid Enterprise Services Procurement by removing from consideration the Extension Contract Year Two Price from consideration (Attachment O, last column). The RFP language was not clear in outlining what scope of work would extend into the second extension year, and bidders were inconsistent in the prices allotted to the second extension year. Therefore, the Department will not consider costs associated by bidders with the second contract extension period and will not extend the successful bidder's contract to the second extension year.

Because this change in the RFP only impacts services in the last contract extension period, the Department is exercising the discretion afforded the agency in Section 2.8 of the RFP to not permit bidders to amend their bid proposals at this stage of the procurement process.
