Transforming Iowa’s Medicaid Program

Mikki Stier, Medicaid Director
August 18, 2015
Current State: Medicaid Today

- Serves nearly 600,000 Iowans annually, or close to 22% of the population
- State’s second largest health care payer
Current State: Medicaid Today

- Iowa Medicaid currently provides health care assistance at a cost of approximately $4.2 billion dollars annually.
- A key budgetary challenge is the increasing costs to provide services and decreasing federal funds to do so.
- The cost of delivering this program has grown by 73 percent since 2003.
- And, Medicaid total expenditures are projected to grow by 21% in the next three years.
<table>
<thead>
<tr>
<th>Current Iowa Medicaid Model</th>
</tr>
</thead>
<tbody>
<tr>
<td>No single entity responsible for overall management of enrollee’s health care</td>
</tr>
<tr>
<td>Many enrollees do not receive assistance in accessing or coordinating services</td>
</tr>
<tr>
<td>Provider payment not linked to outcomes or customer service</td>
</tr>
<tr>
<td>Provider payment is driven by volume of services versus outcomes</td>
</tr>
<tr>
<td>There is a lack of financial incentive to prevent duplication of services</td>
</tr>
<tr>
<td>Limits budget stability and predictability</td>
</tr>
</tbody>
</table>
Challenges with Today’s Model

Current HMO Model

• Excludes services provided by separate entities
  o Lack of care coordination among providers
  o Limits financial incentives to actively manage a patient’s health care
• Excludes Medicaid enrollees when they become eligible for HCBS waivers or long-term care
• No financial incentive to prevent institutionalization

Current MediPASS Model

• Service delivery generally not tied to quality measures or clinical outcomes
• Lacks incentives for integration and care coordination
• No overarching entity responsible for outcomes across the delivery system
Using Innovation to Address a Changing and Growing Program

- Medicaid Expansion
- Healthy Behaviors Program
- Health Homes
- Medicaid Modernization
- State Innovation Model Grant
Iowa’s Transition to Managed Care

- Medicaid agencies (Iowa Medicaid Enterprise) contract with managed care organizations (MCOs) to provide and pay for health care services
- DHS will contract with **two to four** managed care organizations
  - Required to provide statewide access
- Services set to begin January 1, 2016
- MCOs establish a network of providers and utilization guidelines
Iowa’s Goals

- Improved quality and access
- Greater accountability for outcomes
- More predictable and sustainable Medicaid budget
Which Members Are Impacted?

**Included**
- Majority of Medicaid members
- *hawk-i* members
- Iowa Health and Wellness Plan
- Long Term Care
- HCBS Waivers

**Excluded**
- PACE (member can opt in)
- Programs where Medicaid already pays premiums: Health Insurance Premium Payment Program (HIPP), Medicare Savings Program only
- Medically Needy
- American Indians/Alaskan Natives (can opt in)
- Undocumented persons eligible for short-term emergency services only
Member Benefits In Managed Care

- Design **includes all Medicaid covered medical benefits**
  - No benefit changes, unless due to eligibility or level of care needs
- MCOs will integrate physical health, behavioral health and long term services under one program
Improved Quality Outcomes

Member Benefits

- Members receive health screening and services tailored to individual needs
- Individuals with special health care needs will have comprehensive health risk assessment
- Care coordination must be person-centered and address unique needs
- MCOs can provide enhanced services not available through a fee-for-service model
Coordination with the State Innovation Model (SIM)

The SIM grant is designed to help the state plan, design, test, and evaluate new payment and service delivery.

- There are two key features going forward with this initiative:
  - Value Index Score (VIS)
  - Value-based Purchasing
Value-Base Purchasing Models

- Medicaid, using MCO oversight, will ensure value-based activities align in Iowa
  - Each MCO shall support the SIM grant activities
  - Each MCO shall use a value-based purchasing model for at least 40% of population by 2018
  - Each MCO shall use the Value Index Score (VIS)
Quality Measures and VIS

• Medicaid Implemented VIS in 2014 as a bonus program for primary care providers serving Iowa Wellness Plan members
• MCOs will use VIS in their value-based purchasing models
• MCOs will be evaluated on their overall VIS performance
Iowa Medicaid VIS Results

- PCPs that improved their VIS score over a 12 month period also lowered their total cost of care during that same period.
Achieve Scale and Track Improvements

- By developing value-based purchasing arrangements like other payers, providers and community partners can focus on changes that impact not only the whole person, but all people they serve.
